Divisions of Hydrology. Hydrology can generally be divided into two main branches. 1. Engineering Hydrology. Engineering hydrology deals with the planning, design and Operation of Engineering projects for the control and use of water. 2. Applied Hydrology. Applied hydrology is the study of hydrological cycle, precipitation, runoff, relationship between precipitation and runoff, hydrographs, Flood Routing.

Description Water resources engineering is the quantitative study of the hydrologic cycle -- the distribution and circulation of water linking the earth's atmosphere, land and oceans. Surface runoff is measured as the difference between precipitation and abstractions, such as infiltration (which replenishes groundwater flow), surface storage and evaporation.
