Love Medicine, then, is a book about the prairie that examines the wild, chaotic lives of several Indian families whose lives on the reservation have immersed them in a dark and often violent existence, one that the author seems to equate with Ahab. It is a world created by a white-shall we say malicious-intelligence, except that behind the scenes hovers an amazing human being, June Kashpah, whose life and recent death still give meaning and hope to its members.

There's lots to enjoy about Louise Erdrich's Love Medicine which is variously badged as a novel and a collection of linked short stories. The insights Erdrich gives us into the world and lives of native Americans from the 1930s until the late twentieth century are fascinating - as far as I know, little has been written about this from the insider perspective.

The first of Louise Erdrich’s polysymphonic novels set in North Dakota - a fictional landscape that, in Erdrich’s hands, has become iconic - Love Medicine is the story of three generations of Ojibwe families. Set against the tumultuous politics of the reservation,the lives of the Kashpaws and the Lamartines are a testament to the endurance of a people and the sorrows of history.

The first book in Erdrich's Native American tetralogy that includes The Beet Queen, Tracks, and The Bingo Palace is an authentic and emotionally powerful glimpse into the Native American experience--now resequenced and expanded to include never-before-published chapters.

A teacher's guide for Louise Erdrich's Love Medicine.

Expanded to include previously unpublished chapters, this collection of interrelated stories of love, betrayal, mystery, and madness concerns men and women bound by blood, legend, tradition, and need

"A beautiful collaboration that brings together diverse perspectives...a common passion and sense of beauty unites the book and transcends any expectations." --BOOKLIST A diverse array of people--psychologists and poets, biologists and artists, a Buddhist teacher and a rock musician--share personal stories that reveal a common theme: when we pay conscious, careful attention to our wider world, we strengthen our core humanity. This practice of natural history leads to greater physical, psychological, and social health for individuals and communities. Nature, Love, Medicine features writers with varied backgrounds and talents. Notable contributors range from conservationist and author Brooke Williams and award-winning author Elisabeth Tova Bailey to Vietnamese Buddhist monk and teacher Thich Nhat Hanh and internationally known poet Jane Hirshfield. THOMAS LOWE FLEISCHNER, editor of Nature, Love, Medicine, is a naturalist and conservation biologist, and founding director of the Natural History Institute at Prescott College, where he has taught interdisciplinary environmental studies for almost three decades. He edited The Way of Natural History and authored Singing Stone: A Natural History of the Escalante Canyons and Desert Wetlands.

She was the daughter of the Patriarch of a crazy and foolish family who was subject to bullying by others. She was a goddess who could shake the world. When the two ghosts were transformed, the world started to turn upside down on this foreign land. He was the cold and overbearing Undefeatable War God. He was a memory that could split heaven and earth. When the host and the main host competed for love, the situation once again changed. Who said that a person had to follow the path of the heavens and go with the heavens? She wanted to charge into a new world and become a terrifying ghost. She was the only one who held authority over the world.

Lavishly illustrated and beautifully presented 53 colour illustrations of art Marvel at the A4 size pictures in a hardback volume Read the stories behind them Alan and Marcia Emery present a superb collection of over fifty pieces of art, reflecting the physician's role in society and the relationship between doctor and patient. Medicine and Art contains an international selection of artworks, tracing both the history of art and the development of medicine from the Ancient Greeks to the present day, illustrating changing perceptions and applications of medicine, through varied styles and artistic media. Each work of art is accompanied by a short essay describing the history of the artist and the subject of the artwork. The full colour illustrations and detailed Appendix of further artworks depicting specific medical conditions make this book a unique treasure trove of information for all who share the authors' love of art, history and medicine. This intriguing book evolved from a series of articles written and researched by Alan Emery about art and medicine in Clinical Medicine, the journal of the Royal College of Physicians of London. In addition to his life-long love of art, Professor Alan EH Emery has written over twenty books and 300 scientific articles during his long career in medical genetics. Marcia LH Emery shares her husband's love of art and history. She qualified in psychology in the UK and later obtained qualifications in library science at Case Western Reserve University, USA.

This book highlights indigenous American women throughout modern American history, countering past stereotypes by offering twenty original scholarly chapters featuring historical and biographical analyses of Native American women who excelled in education, health, medicine, and the arts.

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.

This absorbing volume examines cultural role of rock art for the Apsaalooke, or Crow, people of the northern Great Plains by examining collective concepts of landscape as well as shared memories of historic Crow culture."
