Parking Layout Guidelines
Parking Layouts. Parking layouts are strategies for efficiently organizing multiple indoor or outdoor parking spaces. Often laid out in parking lots or designed as multi-level parking structures, parking facilities are essential for systematically storing vehicles in public and private settings. Parking parameters differ between countries and governments and each has developed their own standards.

The layout of the parking facility must be flexible enough to adapt to future changes in vehicle dimensions. The stall and aisle dimensions must be compatible with the type of operation planned for the facility. The critical dimensions are the width and length of stalls, the width of aisles, the angle of parking, and the radius of turns.
