$E = mc^2$ is actually one of the discoveries that Einstein made as part of the theory of relativity; that is, it is one of the equations of relativity. In words, the equation states that energy (the E) is equal to mass (the m) times the speed of light (the c) squared.

What is Relativity? Author Q&A - Jeffrey Bennett

What Is Relativity? is a well-written and uniquely readable book that beautifully serves as an introduction to special and general relativity. Jeffrey Bennett carefully avoids bombastic statements and 'spectacularization' of the subject, sticking with well-established facts and presenting them in a clear and compelling manner.--Alberto Nicolis, Columbia University
